

## Build up Skills Poland IEE Programme

### Build up Skills

It is a programme which aims to analyze the national system of training and certification of workers in the construction sector in the field of RES technologies implementation and solutions that enhance energy efficiency. BupS Poland is carried out under the "Build Up Skills" initiative, recognized in the European Energy Efficiency Action Plan (EEEAP) as one of the key actions for achieving the objectives of the Europe 2020 Strategy. The project is supervised by the Executive Agency for Competitiveness and Innovation (EACI) and supported by the Intelligent Energy – Europe.

The programme is designed to:

- arrange training and retraining system of construction workers;
- introduce into training programs use of RES technologies and solutions increasing energy efficiency issues;
- introduce professional qualifications certification system.

The "BupS Poland" will support the implementation of national and EU climate package commitments by creating national framework for the training and certification system that guarantees:

- adequate number of skilled construction workers – i.a. thanks to the system improving skills of the existing workforce;
- suitably qualified construction workers, ensuring high quality of constructions and installations performed, and utilization of the full potential of RES technologies as well as techniques and building materials.

### Success / Barriers

Success:

Analysis of the vocational education system regarding RES technologies and energy efficiency and identification of future demands for such occupations

Barriers:

No national database on training programs, lack of statistical data on the labor market in constructions in the RES and EE sector.
